Peer (piər), v. 2. Also 6-7 peere, (8 pier) [Known from c 1590: of uncertain origin and history.

Exactly the same sense as 1 below was expressed in the 14th c. by *PIRE* v (app. = LG. *piren*), and *peer* has accordingly been assumed to be merely a later form or spelling of *pire*. But, besides that there was a clear chronological gap between the two words, *peer* is not a phonetic development

of *pire*, and cannot, so far as is at present known, be formally identified with that word; whether there was any irregular or ulterior connexion does not appear. In 15-16th c., *peer*, *peere*, were also ordinary spellings of *PEAR* v = *appear*, and, in many instances (see senses 2, 3 below) the use of *peer* comes so close to that of *peer* (*appear*), that it is difficult to believe that there was not some blending of the two words, attributable to the fact that when *peer*, to look out, is said of inanimate things, the meaning is that they *appear* as if they were looking out. In several of the Shaksperian uses of *peer* it is difficult to determine whether the things are thought of as looking out, or as just appearing.]

[(Like F. *pelican* (1210 in Hatz-Darm.), Pr. *pelican*, Sp. *pelicano*, It. *pellicano*) ad. late L. *pellicānus*, more correctly *pelicānus*, ad. Gr. *πελεκάν*, applied by Aristotle (in part at least) to the pelican (of *πελεκάνες* of *ἐν τοῖς ποταμοῖς γινόμενοι*); app. closely related to *πελεκάν*, -*anta* woodpecker, perh. f. *πελεκάν* to hew or shape with an ax, *πέλεκυς* ax, hatchet, from the appearance or action of the bill.

Pelicanus was also used by the LXX to render the Heb. *מְנַחֵם* (in two or three) of the places in which it occurs (in Eng. versions 'pelican'); in the two others, Isa. xxxiv. 11, Zeph. ii. 14, different Greek words were used, and there the version of 1511 has 'cormorant'; but the Revisers of 1885 restore 'pelican' as in Coverdale.]

1. The bird.

The name now appropriated to a genus, *Pelecanus*, of large gregarious fish-eating water-fowls, remarkable for an enormously distensible membranous pouch which depends from the lower mandible of the long hooked bill and is used for the storing of fish when caught. Two species, *P. onocrotalus*, the Common or White Pelican, and *P. crispus*, the Crested Pelican, are found in South-eastern Europe and adjacent regions, and are the original 'pelicans'; to these the North American species *P. trachyrhynchus* is very closely allied. Other species are found in the West Indies, Africa, India, the Malay Archipelago, and Australia.

In all the quotations down to 14th c. and many later, the identification is vague, the bird being itself unknown in England, and the word merely a reflex of *pelicanus* of the Vulgate in Ps. ciii. 7, *pelicano solitudinis* 'the pelican of the wilderness', which was app. not the pelican of naturalists. In the four other places where the same Heb. word occurs, the Vulgate has *onocrotalus*, a L. name of the modern 'pelican'. Elsewhere (*Comm.* in *Sophom.*, op. ed. Villars VI. 709) St. Jerome makes two kinds of *onocrotalus*, one the water-bird, the other that of the wilderness ('onocrotalorum, duo genera, aliud aquatile, aliud solitudinis'). So Isidore (*Orig.* XII. vii. 32) These appear in the pseudo-Jerome *Brev. in Psalt.* (Villars VII. Appx. 271) as two kinds of *pelicanus* (here identified with *onocrotalus*); whence, ultimately, in Trevisa, quot. 1398 below.

It appears that the name was first given to the Great Auk or Gare-fowl of the seas of Newfoundland, still called in F. *penguin* or *punguin* (1600 in *Hatz.-Darm.*). But it was soon applied also to the birds now called *penguins*, in F. *manchots* (found by Drake at Magellan's Straits in 1578), which have a general external resemblance to the northern bird, though, in the opinion of zoologists, widely removed in structure. In this sense, also, Du. and Ger. *punguin*, Da. and Sw. *penguin*, all from English.]

There are many other kind of birdes store, too long to write, especially at one Island named Penguin, where wee may drue them on a plankie into our ship as many as shall lade her. These birdes are also called Penguins, and cannot flie. 1582 Ingram's *Narrative* in Hakluyt *Voy.* (1589) 560 The Countrey men call them Penguins (which seemeth to be a Welsh name). 1580 M. [Note. Our earliest examples of the name *penguin* are due to Hakluyt. His account of Hore's Voyage to Cape Breton was taken down by him, some fifty years after the event, from the mouth of Thomas Buts, a survivor of the voyage. If we could be sure that the name 'Penguin Island' dated back to 1536, this would be the earliest occurrence of the word, as it is certainly the earliest English notice of the bird. Ingram's *Narrative*, if reliable, would be evidence for the name in 1582-9, but his tale is discredited, and is thus evidence only that he had heard of the penguin by 1582, four years later than Parkhurst's letter to Hakluyt. The southern fowl, found by Drake (as by Magalhães before him) at Magellan's Straits, is fully described in *The World Encompassed* by Sir Francis Drake, published by his nephew in 1628, 'out of the Notes of Mr. Francis Fletcher', Drake's chaplain (ed. Hakl. Soc., 1854, p. 75), but no name is there given to it. The name occurs however in a MS. of 1677, stated to be a transcript of Fletcher's original Notes of 1578. 'infinite were the number of fowles, which the Welsh men named Penguin, and Magilanus termed them geese' (*ibid.* 72), but the absence of the name from the printed work of 1628, and from three other 16th c. accounts of the voyage (*ibid.* Appendix 217, 227, 279), in which the bird is described, makes the occurrence of *penguin* in Fletcher's original Notes somewhat doubtful. The name certainly occurs in the narrative of Candish or Cavendish, 1588; though his statement that Drake named one of the isles 'Penguin Island' is at variance with that of the eye-witnesses Fletcher and Winter (*ibid.* 76, 279), who both state that he named it *St. George's Island* 'in honour of England'. The attribution of the name *penguin* to 'the Welsh men', and its explanation as Welsh *pen gwyn* 'white head', appears also in Ingram, and later in Sir Thomas Herbert's *Travels*—in ed. 1634, as a surmise, in ed. 1638 as an accepted fact. But, besides that the Great Auk had not a white head (though it had white spots in front of the eyes), there are obvious historical difficulties, which some would remove in part by supposing the name to have been originally given by Breton fishermen. Other suggestions that the name is derived from L. *punguis* 'fat', or is an alteration of 'pin-wing', referring to the rudimentary wings, are merely unsupported conjectures.]

Du Fresnoe shows that even the esquires might bear pennons, provided they could bring a sufficient suite of vassals into the field 1801 *Ibid.* (ed. 2) II 52 The pennon was like a banner, with the addition of a triangular point—By the cutting off of this point, on the performance of any gallant action by the knight and his followers, the pennon was converted into a banner, whereby the knight was raised to the degree of a banneret. 1865 WAT in *Prompt Paro* 392 note. A pennon was a small flag attached to the lance, whereby the rank of the bearer was known. Wace appropriates it to the knight, and the gonfalon to the baron, but at a later time it seems to have designated the bachelor. In *Harl. MS.* 358, f. 5, may be seen sketches of all these ensigns, the getone being swallow-tailed, the penon triangular, and charged with the armorial bearing, the former being appropriated to the esquire or gentleman, the latter to the knight 1882 CUSSANS *Her.* (ed. 3) 274 The Pennon was usually affixed to the end of a lance, from which it depended, and the Charges thereon were so emblazoned as to appear correctly when the lance was held in a horizontal position.

LG. *pennik*, MDu. *penning*, -ing, also *pen(n)ig*; Du. *penning*), OIIG. *penning* (*phanting*, *phantung*), *phanting* (MIIG. *phantung*, -ic, -ig, Ger. *phantung*), ON. *penning* (mod. Icel. *penning*, Sw. *ODA penning*, Da. pl. *penge* = ON. *pengar* 'money'); not recorded in Goth (which has *skatts* for *dröpnings* in N. T.). In early ME. Ormin had still *penning*; but the usual ME. form after 1200 was *peni*, *peny*, from OE. *peniz* The forms with double *n* in OE. were chiefly Northumbrian; in ME. *pennie*, *penny*, with *nn*, was app. not used till the 15th c. OE. and early ME. had also, less usually, like *OFris.*, forms in *pan*. In ME. the plural *panes*, *panezes*, *penezes*, passed through *panes*, *pannes*, *penis*, *penis*, to the 14th c. *pans*, *pens*, the latter duly spelt in 16th c. *pence*. But, beside this, the fuller *penys*, *pennys*, *pennies*, continued in restricted use: see the forms in A. 2 β, and signification in B. 1 c.

The OE. and cognate forms point back to the types **panning*, **panning*, **panning*, a series which does not conform to any phonetic law, but suggests that the word was foreign and of unsettled form. But it was evidently of WGer. or even (unless the ON was borrowed from OE) of Common Germanic age. No foreign source however is known, and the suffix -ing, occurring in other names of coins, as *shilling*, *farthing*, OHG *cheuring*, etc., bespeaks at least a Teutonic formation on a radical element *pan* or *pan(n)*. This has been sought in WGer. **pan*, OHG *pfant*, PAWN, with reference to a possible use of the *panning*; and in WGer. *panna*, Ger. *pfanne* PAN, with possible reference to shape. Of these words themselves the Germanic origin is uncertain.]

B. Signification.

I. Original senses

1. An English coin of the value of $\frac{1}{20}$ of a shilling, or $\frac{1}{240}$ of a pound; originally and for many centuries of silver, in later times of copper, now (since 1860) of bronze. Denoted (after a numeral) by *d.* (for *denarius*, *denarii*); thus, *5d.*, fivepence.

The coining of silver pennies for general circulation ceased with the reign of Charles II; a small number have since been regularly coined as Maundy money. Copper pennies began to be coined in 1797; copper halfpence and farthings having been used from the time of Charles II.

Harris Lex Techn* II, *Penny*, *Denarius* was the first coined piece of Silver we have any account of, and for many Years the only one 1727-41 *CHAMBERS Cycl.* s. v. The penny sterling is now nigh disused as a coin, and scarce subsists, but as a money of account 1777 *Proclam.* 26 July in *Local Gas* No 14031 *We have thought fit to order, that certain Pieces of Copper shall be coined, which should go and pass for One Penny, and that each of such Pieces of One Penny should weigh One Ounce Avordupois* 1837 *Penny Cycl.* VII 330 *1. The first English (silver) pennies weigh 24½ grains troy* Towards the close of Edward III the penny weighs 18 grains, and in the reign of Edward IV it fell to 12, after previously sinking to 15. In 1557, the penny was reduced to 8 grains, and after the 43rd of Edw. to 7½ grains, at which weight it still continues.

This is the last coinage for the Isle of Man *ibid* 270 *In 1870 a series of nickel pennies, halfpennies and farthings was begun for Jamaica*.

c The full plural, *pennies* (A 2 β), is now used only of the individual coins; *pence* (A 2 γ) is usually collective, expressing the amount, however made up; but it is sometimes used of individual coins, when no stress is laid upon their being such. *Pence* is especially used after numerals, where from *twopence* to *elevenpence* (rarely *twelvepence*) and in *twenty-pence*, it is stressless (tw'p'ens, etc.) and now written in combination. See these words. With other numbers *pence* is written separately (or hyphenated) and has a separate stress, as *eighteen pence* (eigh'teen'pens).

When such a combination means a single coin, or even a single amount, it is treated as a single substantive, and may have a plural, e. g. 'a new sixpence', 'two sixpences'; 'the school children's twopences', 'how many eightpences are there in ten shillings?' See TWOPENCE, THREPPENCE, etc. To such combinations, *halfpenny* and *farthing* are added without and, e. g. 'postage twopence-halfpenny', the early penny-farthing foreign post-card', 'a sixpence-halfpenny shop'. These phrases may also take a plural see quot. 1724. Adjective or attributive uses of these combinations are formed with *penny*, e. g. *twopenny*, etc. see 20.

denote the original price (in 15th c) per hundred;
as *fivepenny nail*, a nail which cost 5d a hundred,
tenpenny nail, a nail costing 10d. a hundred. (These
names persisted after the prices fell, as they began
to do in some places before 1500, and they are
now used to designate sizes of nails.)

Penny-a-line, *a* [The phrase (*a*) penny a line used attrib.] Of writing or a writer. Paid at the rate of a penny a line; of cheap and superficial literary quality. (Cf. PENNY-A-LINER.)

1833 Westm. Rev. XVIII. 199 The penny-a-line men are generally persons who are by no means qualified to report common proceedings. 1849 THACKERAY Lett. Feb. [It] will afford matter to no end of penny-a-line speculation.

Penny-a-liner. [f. as prec. + -ER. 1.] A writer for a newspaper or journal who is paid at a penny a line, or at a low rate (usually implying

one who manufactures 'paragraphs', or writes in an inflated style so as to cover as much space as possible); a poor or inferior writer for hire; a hack-writer for the press. (contemptuous.)

Pennyland. *Obs. exc. dial.* Also 3 penlond.

[f. PENNY + LAND; app. the vernacular form of med.L. *denariata* (denariata, denariata) terræ (see DENARIATE), and possibly also of *munuata* terra, the rent of which was (sometimes at least) a penny.

Cf. 'duodecim tamen nummata, singulos annos redditores ei 12 denarios' (Madox Eccl. I. 155).]

A portion or measure of land valued at a penny a year; a DENARIATE.

Its extent may have varied in different localities; one quotation in Du Cange refers to a teneament of half a rood and three denariates, whence it appears that there were more than three pennylands in half a rood. If there were four, the pennyland would be $\frac{1}{4}$ of an acre, or 5 sq. poles, enough for a house and small yard. In some parts of France the *denier* (=denariata) is still a measure of 473 peches (Godef.). But the pennylands of Orkney and Shetland may have been of greater extent.

A. sb A verse or line consisting of five feet.

1. In Greek and Latin prosody. A form of dactylic verse composed of two similar halves (penthemimers), each consisting of two feet and a long syllable (thus equivalent to a dactylic hexameter with the second half of the third and of the sixth foot omitted); in the first penthemimer each of the two feet may be either dactyl or spondee, in the second they must both be dactyls. Most commonly used in alternation with hexameters, constituting *elegiac* verse: see LLEGIAIC A. 1

The name arose from a mistaken analysis of the verse as two dactyls (or spondees), a spondee, and two anapaests.

Pentecost (pentɪkɒst) Also 5 pentecost, **pentecost**, 5-6 pentecost(e), 6-7 pentecost(e), 7 pentecost. [a. Christian L. *pentecostē* (Tertullian), a. Gr. *πεντηκοστή* (sc. *ἡμέρα* or *ἑορτή*) fiftieth (day or feast), in Tobit ii. 1, 2 Maccabees xii. 32.]

1 A name of Illellesitic origin for the Jewish harvest festival (called in the Old Testament the Feast of Weeks) observed on the fiftieth day of the OMER (q.v.), i.e. at the conclusion of seven weeks from the offering of the wave-sheaf, on the second day of the Passover.

The first day of the Passover is always the 15th Nisan, the 16th Nisan is the First Day of the Omer or wave-offering, seven weeks from which, on the 6th Sivan, is the Feast of Weeks. Thus, in 1900, the 16th Nisan coincided with Sunday 15th April, and the 6th Sivan with Sunday 3rd June, which were also, that year, Easter Sunday and Whit-Sunday, but the Jewish festival, being regulated solely by the moon, may fall on any day of the week see 2 cxxx *Ælfric Hom.* i. 312 On Sam ealdan Pentecosten sette God æðam Israhela folce. c1175 *Lamb. T. PURVIS in *Hastings Dict. Bible* III 741/1 It is certain that the Jews celebrated the sheaf waving on Nisan 16, and Pentecost on the fiftieth day after (Sivan 6), without regard in either case to the day of the week.

2. A festival of the Christian Church observed on the seventh Sunday after Easter, in commemoration of the descent of the Holy Spirit upon the disciples on the day of Pentecost (Acts ii.); the day of this festival, Whit-Sunday, also, the season of this festival, Whitsuntide. *arch* or *list*.

The Resurrection of Christ is recorded to have taken place on the second day of the Passover, being that year the first day of the week. Seven weeks after that (and so again on the first day of the week) was the Feast of Weeks or Pentecost. In commemoration of this, these two Christian festivals are always held on the first day of the week (Sunday), and so in most cases do not coincide with the Jewish festivals.

L. *appendicium* an appendage, f. *appendere* to hang something on another, to attach in a dependent state. As a small building, erected as a 'lean-to' to another, has usually a roof with one slope only, the word was evidently from an early period (esp. in the aphetic form) associated with F. *pende* slope, declivity, 'hang', which became at length a regular element of the sense; hence the later popular etymology *pent-house* for *pentis* cf. *work-house*, vulgarly *workis*.

The OF. *apentis* and *apentis* appear to represent L. *appendicium* and **appendicium*. But the early history of the word offers difficulties, esp. that in OF. the short forms without *a-* are very rare, while in Eng. they are the earliest, *apentice* not being known before Caxton.]

L. and Fl. also in a distributive sense — 'for every..., for each...': used in Eng. in various Latin and OF. phrases, and ultimately becoming practically an Eng. preposition used freely before substantives of many classes.

I. In Lat. phrases (including med. L. and Italian).

b. In *Logic* applied to conversion in which the quantity of the proposition is changed from universal to particular. see **CONVERSION** 4.

Aristotle's term was *ἀντιστροφή κατὰ μέρος* = 'conversion as to a part' because only part of the statement is converted.

Per-, prefix¹. The Latin preposition *per* (see *prec.*) used in composition with verbs, adjectives, and their derivatives. A large number of these have come down through Fr. into Eng.; others have been adopted directly from Lat., or formed in Eng. on Latin elements, or (as was frequent in 16-17th c.) on words already in Eng. use. The following are the chief uses in Latin and English.

1. As an etymological element. In the senses: 1. Through, in space or time; throughout, all over with verbs (and their derivatives), as *perambulare* to walk through, *PERAMBULATE*, *perforare* to bore through, *PERFORATE*, *pervadere* to go through, *PERVADE*, *pervigilare* to watch through, *PERVIGILATE*; forming adjs., as *peruvian* having a way through, *PERVIVIOUS*.

2. Through and through, thoroughly, completely, to completion, to the end, with verbs (and derivatives), as *perficere* to do thoroughly, complete, *PERFECT*, *permutare* to change throughout or completely, *PERMUTATE*, *perpetrare* to Pi R-ETRATE, *perpetrare* to PERTRU; so *PERFUSE*, etc.

3. Away entirely, to destruction, 'to the bad' with verbs (and derivatives), as *perire* to go away with, destroy, lose (*PERDIRE*), *perire* to go to destruction, *PERISH*, *perire* to turn away evilly, *PERVIRE*, *perire* to take away entirely, destroy, annihilate (*PERNITTO*).

4. Thoroughly, perfectly, extremely, very, with adjs. and advbs., as *peracutus* very sharp, *PERACUTE*, *perdiligens* very diligent, *PERDILIGENT*, *perferendus*, *PERFEREND*. Formerly also in Eng. with derived sb. (or their analogues), in sense 'very great', 'extreme', as *perdiligence*, *peradventence*.

II. In Chemical nomenclature. (From 4 above.)

5. Forming sb. and adjs. denoting the maximum (or supposed maximum) of some element in a chemical combination; esp.

a. With names of binary compounds in -IDE (formerly -uret), designating that in which the element or radical combines in the largest proportion with another element, e.g. *PEROXIDE*, *PERCHLORIDE* (*†perchloruret*), *PERIODIDE*, *PERSULPHIDE* (*†persulphuret*), q. v. Also *perbromide* (*†perbromouret*), a compound of bromine with another element or radical, in which the bromine is present in larger proportion than in other compounds: so *percyanide* (*†percyanuret*), *perphosphide* (*†perphosphuret*), etc. Hence in derivative verbs, etc. as *PEROXIDATE*, -OXIDIZE, *perphosphureted*, etc.

This use of *per-* was introduced in 1804 by Dr T. Thomson, in his *System of Chemistry*, ed. 2, for combinations of oxygen with a metal, *peroxide* being used to indicate 'that the metal is thoroughly oxidized', or 'combined with as much oxygen as possible'—see PROXIMATE. It was subsequently extended to combinations of other elements, as *PERCHLORIDE*, etc. In strict chemical nomenclature names in *per-* have been to a great extent superseded by those with more definite numerical prefixes (e.g. *peroxide of manganese* by *manganese dioxide*), or by others in which the constitution of the substance is differently expressed (e.g. *perchloride* and *peroxide of iron*, by *ferric chloride*, *ferric oxide*). But the *per* compounds are retained in some cases, especially in pharmacy and popular use.

b. With adjs. in -IO, naming oxides, acids, etc., designating that compound which contains the greatest proportion of oxygen (and, consequently, the least of the element named), as *perbromic acid*, hydrogen perbromate, *HBrO₄*; *perbromic acid*, *HBrO₄*; *perindiac acid*, indium trioxide, *IndO₃*; *pernitric acid*, *HNO₄*; *perosmic acid* (= *oside*), *OsO₄*; *perurthemic acid* (= *oside*), *RuO₄*, etc. See also *PERCHLORIC*, -IODIC, -MANGANIC, etc. Also in names of the salts of these acids, and analogous bodies, as *PERCHLORATE*, -IODATE, -MANGANATE, -SULPHATE, q. v., *perchlorate*, *perindiate*, *pernitrate*, *perphosphate*, *perurthane*, etc.

Many of these are now abandoned for names otherwise formed, e.g. *pernitrate* of iron, of mercury, now *ferric* and *mercuric nitrate*.

Formerly *per-* was also prefixed to adjs. in -ous, where *hypo-* is now used, as *perphosphurous* = *HYPOPHOSPHUROUS*, so *pernitrous*, *perphosphorous*.

6. In strict philosophical language (first brought into prominence by Reid). The action of the mind by which it refers its sensations to an external object as their cause Distinguished from *sensation*, *conception* or *imagination*, and *judgement* or *inference*.

1762 *KAMES Elem Crit.* III 379 External things and their attributes are objects of perception relations among things are objects of conception 1785 *REID Intell Powers* 1 i. (1803) 28 The perception of external objects by our senses, is an operation of the mind of a peculiar nature, and ought to have a name appropriated to it I know no word more proper to express this act of the mind than perception. *Ibid.* 27 We are never said to perceive things, of the existence of which we have not a full conviction Thus perception is distinguished from conception or imagination Secondly, Perception is applied only to external objects, not to those that are in the mind itself Thus perception is distinguished from consciousness Thirdly, The immediate object of perception must be something present, and not what is past We may remember what is past, but do not perceive it And thus it is distinguished from remembrance In a word, perception is most properly applied to the evidence which we have of external objects by our senses But... the word is often applied by analogy to the evidence of reason or of testimony, when it is clear and cogent. 1840 *MILL Diss. & Disc.* (1859) 11 91 The writer who first made Perception a word of mark and likelihood in mental philosophy was Reid, who made use of it as a means of begging several of the questions in dispute between him and his antagonists 1842 *SIR W. HAMILTON in Reid's Wks* 1. 160/4 According, as in different senses, the subjective or the objective element predominates, we have sensation or perception 1843 *MILL Logic* 1. iii § 4 Besides the affection of our bodily organs from without, and the sensation thereby produced in our mind, many writers admit a third link in the chain of phenomena, which they call a Perception, and which consists in the recognition of an external object as the exciting cause of the sensation. 1855 *MISS COBBE Intell Mar* 1. 46 Every perception necessitates this double element of sensation and intuition,—the objective and subjective factor in combination 1856 *FERRIER Inst. Metaph.* v. 149 a 1860 *WIAFRI v Comptrol. Bl.* (1864) 83 We have a distinct view of the difference between the past and the present, because we have a perception of the latter, and only a conception of the former 1860 *MANSIELO Metaph.* 1. 67-8 Perception... has been used by various writers, in a wider or a narrower sense—sometimes as synonymous with consciousness in general, sometimes as limited to the apprehension of sense alone. Under the latter limitation it has been found convenient to make a further restriction, and to distinguish between sensation proper and perception proper 1876 *MAUNSTON Physiol Mind* iv 227 Perception includes not only the internal feeling, but the reference of it to an external cause. 1884 *J. SULLY Outlines Psychol* v 152.

3. Qualifying a statement so as to express possibility with uncertainty: It may be that; maybe, haply = **PERADVENTURE** *adv* 3, **PERCASE** 3, **PERHAPS** 1. Used *a.* with the subjunctive mood or its equivalent (perchance there may, might, would be); *b.* with the future indic. (perchance there shall or will be); *c.* with the pres. and past tenses indic. (perchance there is, was, has been, etc.).

In *a* the statement is already contingent, and *perchance* may be taken, as in 1 and 2, in its literal sense of 'by chance', 'there may, might, would by chance be', but in *c* the statement is made contingent by *perchance*, and we cannot there substitute 'by chance', the meaning being 'it may chance to be the fact that there is, was, or has been'. This is also true of *b*, but there the event itself being future and so subject to contingency, the use of 'perchance' is somewhat transitional between *a* and *c*. The loss of the subjunctive inflexions in Eng. and the levelling of this mood in form under the indicative, makes some early examples, esp. of the past tense, doubtful between *a* and *c*, thus 'perchance they had' might mean 'perchance they might have', and it may have been in this way that a phrase originally = *Le, forte* has come to be used as *fortisitan*. Cf. also the development in 'it may be that he is here', 'may be he is here', and (*dead*) 'he is maybe here'.

b. *Med.* The action of striking or tapping with the finger, or with a small hammer (*percussion-hammer*) upon a part of the body, either to ascertain the condition of some internal organ by the sound produced, or for therapeutic purposes.

If the stroke is made directly upon the body, it is called *immediate percussion*; if upon something placed against the body (e.g. a finger of the other hand, or a small instrument made for the purpose), *mediate percussion*.

1834 J. FORBES *Laennec's Dis. Chest* (ed. 4) 471 Percussion of the thorax yielded a much clearer sound on the right than on the left side. 1843 R. J. GRUBNER *Syst. Clin. Med.* Introd. c. *Instrument of percussion*: a musical instrument that is played by percussion or striking.

Mostly applied to those used chiefly or solely for marking rhythm, and either struck with a stick or the hand (as drum, triangle, tambourine), or struck together in pairs (as cymbals); rarely to stringed instruments in which the strings are struck by hammers. Hence *percussion* is sometimes used collectively for the instruments of percussion in an orchestra, or their players (cf. *strings*, *wind*, *wood*). 1776 BOSWELL *Hist. Mus.* (1780) I. 255 Musical instruments chiefly of percussion. 1838 *Penny Cycl.* XII. 498 *Instrument*, Musical, are, 1. *Keyed*, as the Organ, Piano-forte, etc.; 2. *Of Percussion*, as the Drum, Cymbals, etc. 1904 *Daily News* 25 Feb. 8/5 Almost all the strings are pupils of the conductor, and the wind and percussion are prominent members of London orchestras.

d. A device in some reed-organs by which a small hammer is caused to strike the reed as the air is admitted to it, thus quickening the production of the sound.

1879 A. J. HIPPINGS in *Grove Dict. Mus.* I. 667 Another major invention was that of Martin, who gave the harmonium 'quicker speech', i.e. made the sound more quickly follow the descent of the key. The invention is known as 'percussion'.

3. *Mus.* The actual 'striking' or sounding of a note or chord, esp. of a discord, as distinguished from *preparation* and *resolution*.

1880 C. H. H. PARRY in *Grove Dict. Mus.* II. 685 *Percussion*, is the actual sounding of the discord.

ME. *parfit*, *-fite*, a. *OF. parfit*, *-fite* (rithic in *Littre*)—*L. perfectum*, pa. pple. of *perficere* to accomplish, perform, complete, f. *PER-* 2 + *facere* to do, make. Subsequently influenced by *OF. parfet*, *-fete*, *-fist*, *-fist*, in which the radical part is *fet*, *fist* (pa. pple. of *facere*)—*L. factum*. At length gradually conformed

(partly through *parfaict*, *perfaict*, *perfect*) to the *L.* original *perfectus*. The change of *par-* to *per-* went on from 14th to 16th c. In ME and 16th c. the stress varied between *perfit* and *perfit*, in Scotch (*perfēt*) is still prevalent in some senses, and in others displaced by (*perfit*)]

Peri, obs. form of **PERAI**, South American fish.

Peri-, prefix, *iepr* Gr. *peri* prep. and adv. 'round, around, round about, about', combined in these senses with verbs and their derivatives, substantives and adjectives; (a) in adverbial construction, as *περιβλέπειν* to look around, *περιστρέφειν* to turn round, *περίοδος* a going round, *περίπατος* walking about, *περίχρστος* girded all over; from the sense 'all over', it was an easy extension to those of 'altogether, quite, very, exceedingly, beyond measure', as in *περικαλλής* right beautiful, very beautiful, and that of 'going beyond' or 'exceeding', as in *περιτοφύειν* to overshoot. (b) In prepositional construction, forming parasynthetic adjs. and derived sbs, e.g. *περικάρδιος* 'situated *περὶ* καρδία, around or about the heart', thence *τὸ περικάρδιον* 'the membrane surrounding the heart, the pericardium'.

A small number of technical Greek words in *peri-* were adopted in ancient Latin; more were added in late and mediæval Latin; most of these are represented in the modern Romanic langs., and in English (see **PERICARDIUM**, **PERIOARP**, **PERIOD**, **PERIPATETIC**, **PERIPHERY**, **PERIPHRASE**, **PERILOUS**, **PERISTYLE**, **PERITONEUM**); and, on the model of these, adaptations of ancient Greek compounds in *peri-*, and new compounds from Greek elements (frequently also from Latin elements), have been introduced in great numbers in modern scientific Latin (esp. in biological nomenclature), and in the scientific terminology of the modern languages generally, in which *peri-* has been found to be a convenient prefix for denominating the structure or region lying round a defined organ or part. Most of these terms are (with the appropriate modification of form) of international currency, and it is often difficult to ascertain in which of several languages a particular term was first used.

The more important *peri-* words (including those of historical standing, and those in more or less general use) will be found in their alphabetical places; others of less importance or more exclusively technical use follow here

1. In numerous scientific terms, chiefly anatomical and pathological.

In these *peri-* has a prepositional relation to the sb implied in the succeeding element (see (b) above)

a. In adjs. = situated or occurring about or around, surrounding or enclosing (the part, organ, etc. denoted by the second element); sometimes also = pertaining to the part, or thing, denoted by a corresponding sb. (see b). as

1. A structure surrounding, or forming the outer part of, a flower; a floral envelope.

† a. In earlier use, a synonym of *CALYX*; and, like it, applied also to an *INVOLUCRE* or whorl of bracts, as that at the base of the flower-head in the *Compositae*. *Obs.*

b. Now, The outer part or envelope of a flower, which encloses the essential organs (stamens and pistils); either *double*, i. e. the calyx and corolla collectively, esp. when so much alike as to appear to constitute a single part, or *single*, when there is only one, which may be either green (*sepaloid*) like an ordinary calyx, or coloured (*petaloid*) like an ordinary corolla.

Bot.** vi. § 1 (ed. 6) 164

c. In liverworts, a leafy or membranous covering surrounding the archegonium; in mosses, the cluster of leaves surrounding the sexual organs in the 'flower'.

6. **Law.** Opposed to *real*. † a. originally, in **personal action** (or *pled*), an action wherein the claim was not the restitution of a specific thing (since the thing might be destroyed, concealed, or transported beyond the reach of the law) but the recovery from the person concerned of compensation, i. e. of damages; distinguished from a *real action*, which claimed the restitution of the thing itself (being something indestructible and irremovable), and from a *mixed action* in which both restitution and damages were demanded. (This distinction is Obs., real actions having fallen out of use early in 17th c., and been formally abolished in 1833. See *Sweet Dict. Eng. Law* 24.) Hence b. **personal property** (*estate*, etc.), things recoverable in the personality or by a personal action, i. e. chattels and chattel interests in land, etc., as opposed to *real property* (*estate*, etc.), i. e. things recoverable in the realty, or by a real action; viz. land (in the legal sense - see **LAND** 4 c), and rights attached to the possession of land. **Personal property** therefore includes generally all property except land and those interests in land which pass on the owner's death to his heir, corresponding in general (though not entirely) to the *movables* of Scotch, Continental, and Anglo-Indian law.

Personal and real action represent L. *actio in personam* and *actio in rem* of the Roman law, in which actions were distinguished by the nature of the right thereby asserted, the terms were taken by Bracton into English Law, but employed in a different way, to distinguish actions according to the process of execution obtained, that is, in reference not to the right asserted but to the relief afforded therein. The thing sought by Bracton's *actio in rem* was restitution of a specific thing which the law was always able to lay hold of and hand over, this limited it to land and rights exercisable over or in respect of land. But land and its rights were hereditary possessions, descending to the owner's heirs, hence *real property* became coextensive with or equivalent to heritable property, and *personal property* came to include all other property, this again reacted upon the definition, inasmuch as the question whether any particular property was hereditary and passed to the heir, or was non-hereditary and passed to the executor or administrator, became the test whether the property or estate was real or personal, so that certain rights attached to land, came to be treated as *real* or *personal*, not according to the original application of these words, but according to the rule which had been established as to the descent of these rights severally. Thus leases, of whatever duration, as well as mortgages and securities for money affecting lands, or heritable property, which in Scotland are themselves heritable and descend to the heir, in England go to the personal representative, and are classed as personal estate. Simple' or 'Plain'.] The name given to the principal version of the Old and New Testaments in the ancient Syriac tongue, sometimes styled the Syriac Vulgate
The two Syriac forms are respectively masc. and fem. of the adj. in the emphatic state, the latter agreeing with *mappāṭhā*, -ā, 'version'. (The final ā and ē represent the same vowel in Eastern and Western Syriac pronunciation respectively.) So far as is known the name appears first in Moses Bar Kepha, 813-903. The date of the Peshito has been variously put, the prevalent opinion is that the translation of the O.T. was made from Hebrew at an early date, and that the Peshito N.T. was a revision or recension made early in the 5th c. of a translation going back, in part at least, to the 2nd c., earlier forms of which are preserved in the Sinaitic and Curetonian MSS. Later versions, more verbally rendering the Greek, were the Philoxenian and Heracleian.

The princes descended from *Sevaji* became *rois fauillants*, the administration being in the hands of the peshwa; in 1749 the holder of the office, Balaji Bishnath, seized the sovereignty and, without changing his official title, made it hereditary in his family. Pestalozzian (pestalō'zian), a. (sb.) [f. surname Pestalozzi + -AN.] Of or pertaining to the system of elementary education introduced by Jean HENRI Pestalozzi (1746-1827), a Swiss educational reformer, who held the chief end of education to be the development of the faculties in natural order, the perceptive powers being the first to be developed. Pet (pet), sb. 2. Also 7-8 pett. [In use since
 end of 16th c., first app. in the phrase 'to take the

It has naturally been associated with *PET* sb. 1 as being a
 characteristic habit of a 'pet' or indulged and spoiled child,
 but the connexion of sense is not very clear or simple, esp.
 in the early phrase 'to take the pet'. It is also to be noted
 that in the 16th, 17th, and early 18th c., *PET* sb. 1 was still
 an exclusively northern word, while *PET* sb. 2 has been app.
 Southern English also from the first.]

In quot. c 1400 we might think that there was a mere conjunction of two well known alliterating names (cf. *Jack and Jill*), but something is prob. due to the association of St. Peter and St. Paul, as leading apostles and saints, and as fellow-martyrs at Rome. The phrase 'to rob Peter, etc.' may have no more specific origin, at least, the current explanation (quoted by Ileylin in 1057-61) is in its details set aside by the chronology, as well as by the occurrence of the phrase in French also cf. 1611 *Cotgr. s.v. Petit (pē'tit, [pē'ti], a. (*sb.*)) Also 6 **petyt, 7 pettit; 8. 5-6 petyts, 5-8 -ite, 7 pettite; 9 7 petet, -e**. [a. **F. petit**, fem. *petite* (11th c.) = **Fr.** and **Cat. petit**, Oit. *petit*, *petito* (both in Florio, 1611). Found in Anglo-Fr. phrases or combs. from 13th c., and as an Eng. adj. in 14th c.; but before 1400 written also *pety*, later *petty*, which became the proper English form; but, beside this, *petit* continued in use, being still common in the 17th c., though little used in the 18th c., exc. as retained in legal phrases, or as influenced by modern French (in some phrases from which it

still occurs). While it was still a living Eng. word the final *t* was pronounced, as shown by the frequent 16-17th c. spelling *petite, -yle* (in Eng. only a spelling-variant, not distinctively fem. as in Fr.). The stress varied; the alliteration and rhythm in *Piers Plowman* shows *petit* (as does the surname *Petit*), while the spellings *petet, -eete*, show final stress.

The origin of **F. petit** is uncertain: 'the primitive type appears to have been **pitittum* or **petittum* (Darmest.), and as there is no such form in **L.**, many scholars think it a derivative of a Celtic root *pett-* 'part, piece, bit', whence also *It. pezza, F. pièce, Eng. piece*. Petrel (pe'trēl). Also 7 pittrel, 8 pittrel, petril, petteril, 8-9 peterel. [Occurs in 1676 as *petrel*, in 1703 spelt *petrel* by Dampier, who says that the name was derived from that of St Peter. see quot. If this was so, *petrel* may have been a formation analogous to *cockrel*, *dollerel*, *haggereel*, *pickereel*; or might represent a Latin dim. of *Petrus* (e.g. *Petrillus*, *Petellus*).

The name appears first in Eng.; it occurs in F. (*petrel*) as a term of Ornithology in Buisson 1760, to Buffon 1782 it was app. an Eng. word requiring explanation. The Norwegian *Soven Feders*, and *Feders fugl* (Björnrich 1764), and Ger. *Petrelvogel* are also later than the Eng. and app. suggested by it, they support Dampier's explanation (But it is of course possible that the word had some other source, represented by *petrel*, and that the association with *Peter* was due to popular etymology.)

A small sea-bird, *Procellaria pelagica*, with black and white plumage and long wings; hence extended (with qualifications) to any species of the genus *Procellaria* (distinctly called Storm-Petrels or Stormy Petrels), or of the family *Procellariidae*, or order *Tubunares*, esp. of the subfamily *Procellariinae*. See quot. 1894.
